

REMARKS

The Office Action dated April 3, 2009 has been received and carefully noted. The above amendments and the following remarks are being submitted as a full and complete response thereto. Claims 1-5 are pending. By this Amendment, the Specification and Claims 1-5 are amended, and Claim 6 is added. Support for the amendments to the claims and subject matter recited by Claim 6 can be found in the application as originally filed. Applicant respectfully submits that no new matter is presented herein.

In the Drawings

The drawings are objected to as failing to comply with 37 C.F.R. 1.84(p)(5) because they include a reference number 24 that is not mentioned in the description. The specification has been amended to correct the inadvertent omission of the reference character 24 and identify the figures in which reference character 24 is provided.

The drawings are objected to as failing to comply with 37 C.F.R.1.83(a) because the drawings must show every feature of the invention specified in the claims. Accordingly, the claims have been amended to obviate the objection to the drawings.

The Applicant respectfully requests withdrawal of the objections to the drawings.

Amendments to the Specification

As mentioned above, the fourth full paragraph on page 4 of the specification as originally filed has been amended to correct the inadvertent omission of the reference character 24.

Claim Rejections -- 35 U.S.C. 112, Second Paragraph

Claims 1-5 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Applicant respectfully submits that Claims 1-5 have been amended in a manner believed to be responsive to the Examiner's rejection.

Applicant respectfully requests withdrawal of the rejection.

Claim Rejection -- 35 U.S.C. 103

Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 1,474,864 to Vogt et al. (Vogt) in view of U.S. Patent No. 6,969,130B2 to Newton, Jr. (Newton), U.S. Patent No. 5,476,316 to Batrone et al. (Batrone), and U.S. Patent No. 4,417,527 to Williams et al. (Williams). Applicant respectfully traverses the rejection for at least the following reason(s).

Claim 1 recites a special urban transformation center that includes, among other features a concrete base, an interior cabinet that includes a ventilation grill, and an external enclosure that includes at least one hollow pillar and a roof with holes in a lower surface thereof, wherein the at least one hollow pillar stands vertically between the base and the roof and provides a conduit that works in tandem with the ventilation grill to evacuate heat generated by the transformer from the interior cabinet to outside of the special urban transformation center through the holes in the lower surface of the roof. See Figures 7 and 9 for an exemplary embodiment of the above-discussed features.

Applicant respectfully submits that Vogt, Newton, Batrone, and Williams, alone or in combination, do not disclose, teach or suggest a hollow pillar that works in tandem

with a ventilation grill to evacuate heat generated by a transformer from an interior cabinet to the outside of the structure through holes provided in the roof. Accordingly, Applicant respectfully submits that Vogt, Newton, Batrone, and Williams, alone or in combination, fail to anticipate or render obvious each and every one of the features recited in Claim 1. Applicant respectfully submits that Claim 1 should be deemed allowable over Vogt, Newton, Batrone, and Williams.

Claims 2-5 depend from Claim 1. It is respectfully submitted that these dependent claims should be deemed allowable for at least the same reasons that Claim 1 is allowable as well as for the additional subject matter recited therein.

Applicant respectfully requests withdrawal of the rejection.

New Claim 6

Applicant respectfully submits that Claim 6 is allowable for at least the same reasons Claims 1-5 are allowable, as well as for the additional subject matter recited therein.

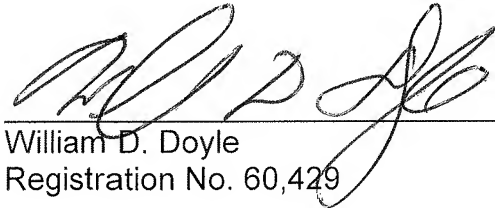

Conclusion

In view of the foregoing, Applicant respectfully requests reconsideration of the application, withdrawal of the outstanding objections and rejections, allowance of Claims 1-6, and the prompt issuance of a Notice of Allowability.

Should the Examiner believe anything further is desirable in order to place this application in better condition for allowance, the Examiner is requested to contact the undersigned at the telephone number listed below.
